

JCB Stretch from

**A.M.PHILLIP**

**Agritech**  
www.amphillip.co.uk

Based on the JCB 2155 or 2170 Fastrac,

### **The Fastrac Stretch from A M Phillip Agritech Ltd**

The manufacturing division of A M Phillip Ltd. extend the chassis with professionally manufactured, pre-formed, chassis members that are either 750mm or 1100mm to give a chassis with

**Improved weight Distribution ● Longer load Platform**

**Lower centre of Gravity ● Better Visibility ● Greater Stability**

A further 750mm can be attached to the back of the chassis to support equipment with a longer sub frame

Suitable for Sprayers and Spreaders the JCB Stretch retains all JCB's standard and optional features.

**NO COMPROMISE**

**Ideal for Spraying, Spreading**

**and still available for Cultivation and High Speed Haulage**

A Product  
of Hard Work

A genuine multi-role Farm Vehicle capable of primary cultivations as well as Spraying, Spreading, and High speed haulage.

Developed in consultation with JCB the Fastrac Stretch enjoys the same support as all JCB equipment.

Retaining all the standard and optional features\* the Fastrac Stretch is supported with Parts and Services through your local JCB dealer.

The chassis is cut and a new formed chassis members are held into the frame whilst every care is taken to align the two halves of the existing frame of the Fastrac before the extension is welded in.

Both the main prop shaft and the PTO shaft (if fitted\*) are re-tubed and balanced by a specialised commercial vehicle shaft manufacturer.

The electrical wiring is cut and new colour coded wiring is soldered in with heat shrink wrapping over the joint. Hosing and piping are replaced with new lengths as required.

All equipment is replaced and the vehicle is extensively tested to ensure that it is ready for dispatch to the new owners.

This leaflet should be read in conjunction with the relevant JCB leaflet to get the full specification and options available
